« ____ » _____ 20 ____ № _____

Dear partners!

Velikodalnytsia territorial community consists of three settlements: village Veliky Dalnyk, village Petrodolynske and village The settler The village of Petrodolynske was founded by a German settlement in 1805.

The community includes 12,050 people, among them there are disabled people of the I and II groups of disabilities (352 people), residents who find themselves in difficult circumstances (more than 50 people) and unserved citizens.

The state of war affected the activities of the community, internally displaced persons are registered in the community almost every day, their number is already more than 500 people. The large influx of IDPs affected the load on the water and drainage systems.

The community budget for 2024 compared to 2023 decreased due to the removal of the military personal income tax, therefore, when forming the community budget for 2024, it was possible to foresee only protected articles, and budget development, due to which it would be possible to increase the fund of protective structures was not.

The community needs to increase the fund of protective structures for the protection of children.

For the normal functioning of the educational process, there is a need for shelter for schools located on the territory of the community. There is also a need to find finances for the "Sonechko" kindergarten in the village of Veliky Dalnyk. For the capital repair of the shelter for 170 people, design and estimate documentation has already been prepared, the cost of which is UAH 5.5 million, which is currently an unaffordable amount for our community.

The dispensaries are in a bad condition, in which there are no shelters at all.

If possible, we ask you to assist in finding finances for the construction of shelters or the purchase of quickly built protective structures of modular types of civil protection, in the construction of a dispensary and in the purchase of garbage trucks.

**Best regards
Village head**

Denys TKACHENKO
